PROFILE

SecuriNets Technical Team Instructor and Networks and Telecommunications student at INSAT, passionate about cybersecurity, networking, DevOps, DevSecOps, and web development. Skilled, motivated, curious, and versatile, I am eager to apply my knowledge to concrete and innovative projects.

PROFESSIONAL EXPERIENCE

- SecuriNets — Technical Team Instructor**

Current
- Teach technical workshops and guide learners through practical cybersecurity and binary exploitation.
- Digital Forensics Police Internship — FACEIS**

1 — 31 August 2026
- Designed and built a facial investigation platform using RetinaFace, ArcFace, FAISS, FastAPI, and audited workflows.
- Zedka Services — Web Development Intern / Contributor**

June 2024 — August 2024
- Contributed across full-stack development, page optimization, content integration, configuration, and maintenance.

PROJECTS

- MOJO-JOJO CTF — Challenge Author**
- Designed advanced binary-exploitation challenges covering stack pivoting, heap overflows, SROP, and related techniques.
- FST Bootcamp CTF Challenges — Binary Exploitation**
- Created Dockerized ROP, ret2shellcode, and format-string challenges for the FST bootcamp.
- TaskManager DevOps Pipeline**
- Built a Spring Boot/PostgreSQL task manager, containerized with Docker, deployed on Kubernetes, integrated through GitHub Actions, and monitored with Prometheus and Grafana.
- Tor Network Simulation**
- Modeled onion routing with multilayer encryption, relay nodes, and circuit-based TCP/IP traffic tunneling.
- 5G Mesh Network Simulation with OMNeT++**
- Developed a simulation environment for studying the behavior of a 5G mesh network.

SKILLS

Networks & Telecommunications:Network configuration, troubleshooting, Cisco Packet Tracer simulations, and security concepts.

Cybersecurity:Vulnerability analysis, system hardening, Linux security administration, binary exploitation, and reverse engineering.

Programming & Web:HTML, CSS, JavaScript, TypeScript, React, PHP/Symfony, Python/Flask, WordPress, MySQL, C, C++, and Java/Spring Boot.

Systems, Tools & Environments:Linux, Docker, Git/GitHub, GitHub Actions, Jenkins, Kubernetes, Terraform, Ansible, Prometheus, and Grafana.

DISTINCTIONS

- 4th place in Africa — SecuriNets international qualifiers
 - 7th place — SecuriNets international final
 - 1st place — SecuriNets ISI qualifications
- 1st place — SecuriNets ISI national final
 - Top 8 — Claw The Flag CTF
 - 1st place — Friendly CTF ENIT

CERTIFICATIONS

- CCNA: Introduction to Networks — Cisco
 - CCNA: Switching, Routing & Wireless Essentials — Cisco
 - Certified Red Team Operations Management
- Google Cybersecurity — Coursera
 - CS50's Introduction to Computer Science — Harvard University
